DETAILED ACTION

Response to Arguments

1. Applicant's arguments, with respect to the Blakley reference have been fully considered and are persuasive. The previous rejections have been withdrawn.

Allowable Subject Matter

2. Claims 37-49 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose or make obvious the authentication scheme wherein a first server receives a first authentication request. In response, the first server generates and transmits a response containing an assertion reference to the first authentication request. A second server receives an access request that includes the assertion reference. The second server sends a certificate associated with the second server to the first server. If the certificate is present in a trusted partner list maintained by the first server, an assertion is sent from the first server to the second server. In response to receiving the assertion, the second server transmits a response to the requesting granting the requested access.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
